

Network Vulnerability Scanner Report

Device Name: MOAAZ-ELPOP

Device Type: Windows

URL/IP: 192.168.1.12

Summary

Overall Risk Level:	No risks found
Critical:	No critical issues
High:	No high risk issues
Medium:	No medium risk issues
Low:	No low risk issues
Info:	No info level issues
Scan Duration:	No duration available

Service: msrpc | Protocol: tcp | Port: 135

Risk Description: Info

Recommendation: Update to the latest stable version with security patches available

Service: netbios-ssn | Protocol: tcp | Port: 139

Risk Description: Info

Recommendation: Update to the latest stable version with security patches available

Service: microsoft-ds | Protocol: tcp | Port: 445

Risk Description: Info

Recommendation: Update to the latest stable version with security patches available

Service: vmrdp | Protocol: tcp | Port: 2179

Risk Description: Info

Recommendation: Update to the latest stable version with security patches available

Service: postgresql | Protocol: tcp | Port: 5432

Risk Description: Info

Recommendation: Update to the latest stable version with security patches available
